

XIN SHAO

Senior Software QA Engineer/Manager

PROFESSIONAL SUMMARY

Accomplished **Senior QA Engineer and Automation Leader** with 15+ years of experience designing and implementing robust automation frameworks across web, API, and data platforms. Expertise in **Python, Pytest, Selenium, Playwright** and **GitHub Actions**, integrating quality processes within agile development lifecycles. Adept at translating complex business and technical requirements into effective test strategies, identifying system vulnerabilities early, and ensuring consistent product excellence. Passionate about fostering team collaboration and mentoring engineers to achieve quality maturity and delivery excellence.

SKILLS

Python, HTML/CSS, JavaScripts, Google Cloud Platform, Snyk, Burp Suite, WireShark, Packet Tracer, Selenium, Playwright, Appium, Xcode, Android Studio, Pytest, GIT, Docker, Postman, Jenkins, Jira, AWS, Airflow, Confluent, Microsoft Suite, Google Suite, PostgreSQL, MySQL, SQLite, Anaconda, Pandas, Pydantic, Great Expectations, Numpy, Sklearn, Matplotlib, Tableau Desktop, Jupyter Notebook, Machine Learning, Deep Learning, Asset Management, Vulnerability Management, Incident Response, OWASP, Web Security, NIST Cybersecurity Framework, CIA Triad, HIPAA, PCI DSS, Security Command Center, SIEM, SOAR, Data Encryption, Data Governance, Disaster Recovery Planning, MITRE ATTACK, Network Security, Threat Detection, Threat Prevention, Cloud Security.

EDUCATION

M.S., DIGITAL FORENSICS AND CYBERSECURITY, GPA: 4.0 Sep 2024 - May 2026
CUNY – John Jay College of Criminal Justice

B.S., ELECTRICAL ENGINEERING & APPLIED MATHEMATICS (DOUBLE MAJORS) May 2006
SUNY At Stony Brook Melville, NY

EMPLOYMENT HISTORY

CYBERSECURITY ANALYST INTERN Jun 2025 - Aug 2025
NYC Department of Environmental Protection New York, NY

- ♦ Investigated security alerts from Armis and Cortex XSIAM platform.
- ♦ Analyzed tactics, techniques and procedures (TTPs) to simulate potential cyberattacks.
- ♦ Leveraged external Python open sources tools like Snaffler, Snaffer Parser and Hawk Eye to identify any sensitive and PII information. During network scans, identified **880, 697 vulnerabilities, including 140 critical issues**, all of which were remediated prior to completion of the internship.
- ♦ Monitored data flows to identify security anomalies, leading to enhanced threat detection and reduced risk exposure for critical assets.
- ♦ Developed Python scripts to automate routine cybersecurity tasks, significantly improving operational efficiency and response times.
- ♦ Partnered with team members to remediate vulnerabilities, fostering a proactive security culture and strengthening overall network defenses.
- ♦ Conducted thorough evaluations of network-connected assets, identifying vulnerabilities and implementing corrective measures to enhance overall security posture.
- ♦ Set up Prisma cloud and Checkov to run application source code scan and identify any vulnerability and sensitive information
- ♦ Used PDQ Deployment to install or uninstall any application or package to target machines

SENIOR SOFTWARE QA MANAGER

Moxe Health, Inc

Apr 2023 - Oct 2024

Madison, WI

- ◆ Oversaw and provided leadership to both onsite and remote QA Automated Engineers, ensuring efficient collaboration and a cohesive testing strategy.
- ◆ Took charge of a high-performing functional software quality team, guiding them towards achieving excellence in software testing and quality assurance.
- ◆ Founded and supervised a dedicated data quality team, focusing on data integrity, consistency, and quality throughout the organization.
- ◆ Assembled and managed a specialized performance testing team, optimizing application performance through rigorous testing procedures.
- ◆ Achieved cost saving by orchestrating the migration of existing tests from Jenkins Server to Github Actions, streamlining the testing infrastructure.
- ◆ Leveraged Sync vulnerability scanning to automatically detect any security vulnerabilities in our existing Python automation test suites and remediated them promptly

SOFTWARE QA MANAGER

Moxe Health, Inc

Nov 2022 - Apr 2023

Madison, WI

- ◆ Led the QA automation team with a remarkable 90% approval rate from peers and colleagues, reflecting strong leadership and effective management skills.
- ◆ Successfully managed and provided leadership to a team of 6 QA automation Engineers, fostering collaboration and productivity in a remote work environment.
- ◆ Formulated and executed high-level testing strategies for the QA team, ensuring alignment with company objectives and product development goals.
- ◆ Spearheaded the development of quarterly and yearly QA initiatives, strategically aligning them with the company's overarching goals and priorities.
- ◆ Developed, implemented, and managed QA comprehensive QA processes and strategies, guaranteeing that products consistently met required quality, functional, and reliability standards prior to delivery.
- ◆ Collaborated with team leads to develop reliable, scalable, and consistent test data, facilitating smoother testing processes within the Engineering team.
- ◆ Collaborated closely with engineering team leads and managers to swiftly address and resolve any encountered issues, promoting seamless product development life cycles.

PRINCIPLE QA ENGINEER

Moxe Health, Inc

Jul 2022 - Nov 2022

Madison, WI

- ◆ Successfully managed and provided remote leadership to a team of 6 QA Automation Engineers, ensure seamless collaboration and productivity.
- ◆ Pioneered the development of QA initiatives strategically synchronized with the company's quarterly and yearly objectives, contributing to organizational success.
- ◆ Developed, implemented, and managed comprehensive QA processes and overarching strategy to guarantee that product consistently met specified quality, functional, and reliability criteria prior to delivery.
- ◆ Designed and built a robust web automation framework from scratch using Python, Selenium, and Pytest, maintaining and expanding the test suite to cover web applications comprehensively.
- ◆ Developed a comprehensive API automation framework from the ground up using Python, Request and Pytest, covering API tests and maintaining the test suite.
- ◆ Collaborated closely with product managers and development leads to identify root cause and implement effective resolutions for issues and challenges.
- ◆ Guided creation of comprehensive test plans, test cases, test scripts in Python through collaborative meetings with product managers to analyze business requirements.

SOFTWARE QA LEAD***Moxe Health, Inc*****Jun 2021 - Jul 2022*****Madison, WI***

- ◆ Successfully managed and provided remote leadership to a team of 3 QA Automation Engineers, ensuring effective collaboration and productivity.
- ◆ Identified and established precise quality standards, metrics, and objectives across multiple products, maintaining a high level of quality assurance throughout.
- ◆ Designed and built both Web and API automation frameworks from scratch using a suite of technologies, including Python, Selenium, Request, PlayWright and Pytest. These frameworks covered web applications and API endpoints and were meticulously maintained.
- ◆ Provided leadership and mentorship to QA automation engineers in other scrum teams, empowering them to deliver business value within Sprint cycles, fostering knowledge transfer and growth.
- ◆ Collaborated closely with product managers and development leads to identify root causes of issues and implement effective resolutions, ensuring product quality and stability.
- ◆ Worked extensively with patient clinical data requests, collaborating with both payers and healthcare providers to ensure data accuracy and compliance with regulatory standards.

PRINCIPAL QA ENGINEER***Truveris, Inc*****Sep 2015 - Feb 2021*****New York, NY***

- ◆ Provided leadership in data quality across all API, web and data products company wide.
- ◆ Developed a brand-new automated UI test suite using Python, Selenium and Pytest for covering web apps from scratch.
- ◆ Developed Python data analysis programs along with Jupyter Notebook using Panda, Numpy and Matplotlib to analyze more data and gain insight into our product.
- ◆ Built and managed a team of remote and local QA engineers.
- ◆ Mentored other QA team members in other scrum teams to enable them to deliver business value within a Sprint.
- ◆ Investigated data quality issues and data scenarios resulting from development, operation and customer issues.
- ◆ Monitored QA team automation projects progress weekly and make sure it aligns with company's annual goals.
- ◆ Organized, prioritized, and worked through QA activities and made sure that products would be released on time.
- ◆ Worked mostly with patient's claim data on different Guarantee, GDR and Mercers reports for Anthem (WellPoint), Towers Watson and Aon Hewitt.

SENIOR QA ENGINEER***Truveris, Inc*****Nov 2011 - Aug 2015*****New York, NY***

- ◆ Developed test cases from the product specifications documents to cover all aspects of the products entered in Turantula and constantly improved software quality.
- ◆ Created and ran Selenium test cases for web applications.
- ◆ Recorded defects in Trac and Jira to provide detailed explanations to be fixed.
- ◆ Provided training and coaching in QA tools and best practices to QA, development, DevOp and business members.
- ◆ Developed testing processes and strategies in conjunction with software development vendors, business stakeholders and offshore QA team.
- ◆ Assisted business stakeholders in developing an user acceptance test process and plan
- ◆ Worked with product management and development team to understand business and technical requirements, track milestones and manage issues and risks.
- ◆ Presented dashboard reports of delivery status to stakeholders and business leads.
- ◆ Performed end-to-end manual testing focusing in depth on specific areas of the products.
- ◆ Developed and analyzed UI for automation testing using Python and Selenium.
- ◆ Advised product development team on long term priorities and enhancements.
